	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of Application/Amendment/Claims

This Office action is in response to the communications filed on January 4, 2007.

Currently, claims 31-35 and 39-55 are pending. Applicants have cancelled claims 1-30 and 36-38 and elected claims 31-35 and 53-55 on March 16, 2006.

The following rejections are either newly applied or are reiterated and are the only rejections and/or objections presently applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Response to Amendment

The declaration under 37 CFR 1.132 filed on January 4, 2007 is sufficient to overcome the rejection of claims 39-40 based upon Dieter Cotter Gruenert's declaration that the *in vitro* data in the instant disclosure sufficiently enable the instantly claimed *in vivo* methods.

Response to Arguments and Amendments

Withdrawn Rejections

Any rejections not repeated in this Office action are hereby withdrawn.

Rejections necessitated by Rejoinder

The following rejections are new rejections applied to the instant application.

Art Unit: 1635

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 39-40 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 10, and 14 of prior U.S. Patent No. 6,774,117 B1. This is a double patenting rejection.

The instantly claimed method of blocking *in vivo* expression of the MN gene in a human and treating neoplastic disease in a human by administering an MN antisense construct complementary to SEQ ID NO:5 is identical in scope with the methods of claims 1, 10, and 14 of prior U.S. Patent No. 6,774,117 B1.

Conclusion

Claims 39-40 stand rejected.

Claims 31-35 and 53-55 are in condition for allowance as stated in the previous Office action mailed on October 4, 2006.
